

Eastside Fire & Rescue Knox Box Program

Issaquah, North Bend, Sammamish, the Snoqualmie Tribe, Mercer Island, and Districts 10, 38, and Woodinville Fire & Rescue

Eastside Fire & Rescue uses the Knox Box program. This provides firefighters with immediate access to locked buildings, in the event of an emergency.

Knox Boxes are primarily used by commercial occupancies. They are also available for residential structures. Eastside Fire & Rescue has a unique key assigned for our department's use only.

Important Reasons to Install a Knox Box

- It eliminates forced entry damage that may not be covered by your insurance.
- It allows immediate entry by firefighters, without waiting for building keys.
- It satisfies local fire codes and emergency access requirements (required for buildings with fire alarms and / or sprinkler systems).
- Feel secure knowing that only the fire department has access to the Knox Box.
- Protect your property from costly damage, with this one-time investment.
